

SEE HOLDING

Björn Schütte, managing partner

The SEE Holding

As a medium-sized enterprise group, the SEE Holding unites the companies Franz Joseph Schütte, W. Kirchhoff, Interport, Eisl and MB Bad & Küche under one mutual umbrella. The core objective is the development and implementation of customised product-range and logistics concepts in the sanitary sector, for customers from trade and industry throughout Europe.

With more than 150 employees at locations in Wallenhorst (Germany), Salzburg (Austria) and Hongkong (China), we are very proud of a continuous and dynamic growth process, and for this reason promote sustainable and holistic solutions.

Our advantage: as an owner-managed business group, our work is characterised by long-term thinking. At the same time, though, we are also in a position to take rapid and efficient decisions.

Please feel free to contact us!

Ambience and Diversity

Allow us to inspire you with the convincing diversity of our product portfolio and discover the possibilities offered by modern kitchen and bathroom design.

With high-quality wash basin and sink fittings, showers, shower cubicles, toilet seats, and a large array of attractive detailed solutions, we have the optimal selection for every taste.

Our customers receive first-class quality products for their kitchen and bathroom offered at an attractive price-performance ratio – always with a convenient function, modern design or classic elegance.

Take a closer look at our product range and convince yourself.

Competence and Service

One of the strengths of our enterprise group is the development of complex POS concepts for the presentation of your components. In this regard, you can select from more than 4,000 items. The result: customised shelf presentations for individual requirements in a number of different areas of application.

As a comprehensive and tried-and-tested provider of sanitary solutions, we provide almost all imaginable components for resource-friendly and safe installation of drinking water, waste water and heating systems.

We can facilitate customer-specific production, skilfully configuring by our trained team and convincing POS support on site.

Seize the opportunity and benefit from our full service, too!

Logistics and Performance

We elaborate individual concepts for our customers and convince them with a high degree of flexibility. This also means that, despite all the technical aspects involved, the person behind it all always remains of paramount importance.

With up to 15,000 picks per day and 18,000 pallet bays, on a total surface of 13,000 m², we are ideally prepared for peak loads.

This way, our approx. 4,000 different items always make their way to your shelves in minimum time – in optimised sales packaging and using efficient delivery routes.

Quality and Experience

To ensure sustainable quality assurance, we have a laboratory equipped with state-of-the-art testing devices.

Apart from a number of different measuring instruments, a salt-spray chamber and a hydraulic testing facility that was developed by ourselves for testing the tightness (leak test), pressure behaviour and rate of flow, we also have machines for material testing by means of X-ray fluorescence and micro-hardness testing at our disposal.

This way, we are able to verify the tightness, processing, material composition as well as the corrosion behaviour and the noise development of our products.

Come and see for yourself and visit us in Wallenhorst. We are looking forward to welcoming you!
